Applicant: Shire of Kondinin
Author: CEO
Date: 11th September, 2017
Disclosure of Interest: Nil
SUMMARY / COMMENT:

Hamm Roller

Quotations were obtained for the supply of a smooth drum vibratory roller from five suppliers. The accepted quote and the lowest price was from Construction Equipment Australia for the supply of a Dynapac CA3500D “C Spec” CA roller at a changeover price after trading our HAMM roller of $98,000.00. Our 2017/18 budget allowed for a $130,000 changeover resulting in a saving of $32,000.

</tr>
</tbody>
</table>

Smith Broughton Auctions have provided us with an outright Purchase Price of $19,800.00 inc GST for the HAMM Roller but believe it could sell for between $24,200.00 - $27,500.00 inc GST if taken to auction.

KN 63 Tipper Truck

Quotations were obtained for the supply of a tipper truck replacing the (traded) 2004 Isuzu Tray Top (KN.63) used by Dave Symcox our Hyden gardener. Quotes were obtained from three companies resulting in a 2017 Fuso Canter 515 City Cab AMT MWM at a changeover price of $48,650.00 from Daimler Trucks being accepted. Our budget allows for a $62,000 changeover resulting in a $13,350.00 saving.

KN51 & KN56 Work Utilities

Quotations were received for the replacement (trade in) of Council’s Holden Rodeo KN.51 and Toyota Hilux KN56. From quotations received from Merredin Isuzu Ute, Narrogin Mazda and Narrogin Toyota, the quotes considered best was the supply of two Toyota Hilux SC 4x2 Workmate manual 2.45l with tipper and tray. The 2017/18 budget allowed for a $25,000 changeover of KN.51, which was achieved under budget by $4318.18. The changeover of KN.56 after trade was $12,000 with the quote received with tipping tray being $18,181.82 (Ex GST) which is $6,181.82 over budget. Due to large savings in other plant replacement areas, (roller & truck), it is recommended that we purchase the replacement vehicle for KN.56 from Narrogin Toyota at the over budget figure of $6,181.82. The net result of purchasing the two Toyota vehicles is $1,863.64 over budget.

9.1.5 Rates Debtors Write Offs

Applicant: Shire of Kondinin
Author: FAO / MOF
Date: 31st August 2017
Disclosure of Interest: No interest to disclose

SUMMARY
To seek Council approval to write-off outstanding amounts owed to the Shire of Kondinin by rates debtors.

In accordance with Section 6.12 of the Local Government Act 1995, the Council is empowered to write-off any amount of money which is owed to the Shire of Kondinin.

COMMENT
Below is the schedule titled “Rates Debtors for Write-Off as at the 31st August 2017” which details the amount owed by rates debtors. As there is no prospect of collecting these monies, they are now recommended to Council for write-off.

SCHEDULE OF RATES DEBTORS (for Write-Off as at 31st August 2017)

9.1.6 Hyden Progress Association (Hyden Young Singles Units sub-committee) Self Supporting Loan Request

Applicant: Hyden Progress Association  
Author: ACEO  
Date: 12th September, 2017  
Disclosure of Interest: No interest to disclose

SUMMARY

Hyden Progress Association (Hyden Young Singles Units sub-committee) is seeking a Self-Supporting loan of $300,000 over a term of 10 years to assist with the construction of 3 additional units at Lot 184 Smith Loop Hyden.

BACKGROUND

The Hyden Progress Association Incorporated (HPA) has been undertaking the staged development of Lot 184 (No.27) Smith Loop, Hyden to provide additional housing in the Hyden town site. Stage 1 has been completed comprising the construction of two (2) new grouped dwellings on the subject land. In 2014 the HPA was granted planning approval for Stage 2 of the project which comprised the construction of two (2) additional new single storey grouped dwellings similar in design to those constructed in Stage 1. A Building Permit was also issued for this development. Both the planning approval and the building permit issued in 2014 lapsed as the development did not commence within the prescribed time period.

In July the HPA re-submitted a planning application for Stage 2 of the development which comprised the construction of the two (2) additional dwellings proposed in 2014, together with an additional third dwelling to be located to the rear of the lot.

Planning approval was granted by way of Resolution 3044 at the July 2017 Council meeting. At that time it was suggested by Councillor Lynch that the HPA may be seeking a Self Supporting loan from Council to assist with the completion of the proposed units.

Attached is a letter of request dated 8th September 2017 from HPA seeking a Self Supporting loan of $300,000 to assist with the construction of the 3 additional dwellings with a total construction cost of $450,000. Funding is being sought over a period of 10 years commencing in October 2017.

HPA received a Self Supporting loan in September 2011 for $175,000 to assist with the purchase of farmland and this was repaid in September 2016.

It is to be noted that this request has been received after construction of the 3 new units has already commenced and no provision has been made in the 2017/2018 budget.

Approval of the loan is subject to WA Treasury approval and is also subject to the Shire of Kondinin advertising its Proposal to Borrow and one month’s public notice of the proposal is given pursuant to Section 6.20 of the Local Government Act, 1995. As such it may not be possible that approval for the loan and the subsequent advance of funds will be forthcoming by October 2017.

Though disappointing that this loan proposal was not received prior to the finalisation of the 2017/2018 budget it is to be noted that the HPA is contributing significantly to the construction costs of the new dwellings ($150,000). Additionally, the provision of additional housing is in line with the Shire of Kondinin Community Strategic Plan 2016-2026 in that it is providing “...greater housing diversity and standards that meets the needs of a broader demographic profile.”

HPA has displayed a proven repayment ability from its cropping program as evidenced by its previous loan.

Statutory Environment

Local Government Act 1995

Policy Implications

The Shire of Kondinin does not have a policy on Self Supporting loans. Consideration should be given to forming a policy for the provision of such loans.

Financial Implications

As a Self Supporting loan HPA is responsible for the servicing of this debt. WA Treasury approval for the loan is a prerequisite.

HPA is prepared to provide guarantors in support of the loan.

Strategic Implications

Supports the following section of the Shire’s Strategic Community Plan 2016 – 2016

“1.1 A vibrant and attractive place to live that offers choice and a liveable environment
1.1.1 Promote the Shire of Kondinin as a great place to live, work, visit and invest
1.1.2 Encourage greater housing diversity and standards that meets the needs of a broader demographic profile.”

Voting Requirement
Absolute Majority

RESOLUTION 3082
Moved Cr James              Seconded Cr Butler
THAT Council seek a Self Supporting loan of $300,000 from WA Treasury Corporation for a 10 year term to assist Hyden Progress Association with the construction of 3 additional units at Lot 184 Smith Loop, Hyden totalling $450,000.
Approval is subject to:
One month public notice of the proposal is given pursuant to Section 6.20 of the Local Government Act, 1995.
WA Treasury Corporation approval.
Guarantee to be provided from suitable Guarantors in support of the loan

CARRIED 7/0
Absolute Majority

**TOTAL** $943,239 $642,877

December 2017 at the latest.

- **In Progress** – Stone Mason engaged for May 2017. Concrete and stone mason work has been completed. Plaques and Map completed and delivered to be installed prior to 23rd September 2017.

- **In Progress** – Application submitted 20th October 2016 and approved in January 2017. Gabion seating has been installed and several new plantings have been undertaken. Timber slats for gabion seating completed.

- **In Progress** – Application submitted on 13th December 2016 with outcomes scheduled to be received by May 2017. Celebrity Chef, Anna Gare and sous Chef Sophie Budd have been booked in as the celebrities for the Twilight Markets to coincide with Kondinin Arts Show. Work has commenced on obtaining stall holders and produce from local producers for the chefs to cook with. Event also been widely advertised through various mediums.

- **Decision changed (now unsuccessful)** – the Shire has received approval for grant money ($265,500 per unit) for the building cost of four (4) new units. Two at Whispering Gums in 2019/2020 and Two (2) at West Court in 2020/2021. The remaining costs including: project coordination, land assembly and site works and landscaping and driveways are to be contributed by the Shire. The land value ($100,000) was also considered a Shire contribution. Letter received from Ralph Addis, the Director General, Department of Primary Industries and Regional Development advising that this funding through Royalties for Regions is no longer available. Separate item relating to this matter in CEO report of September 2017 Council Meeting.

- **Completed** – Application to engage Ashley Collard to run a 3 day art project in Kondinin in July 2017 to create: Noongar 6 season poles in the community garden; community school centenary mural and rock painting was submitted on 13th January 2017. Re-submitted in April and approved in May 2017. During NAIDOC week the poles in the community garden were painted in the 6 seasons and a BBQ lunch and Noongar games was provided on the Thursday. Due to standard of original mural Georgina Paterson was engaged to complete the mural on the 14th and 15th August 2017.

</tr>
</tbody>
</table>

BACKGROUND
Over the past 12 months, Lacour Energy has been investigating the feasibility to site a wind farm on the subject lot using data collected using a SODAR which has revealed that there is a significant potential for a wind farm in this location. As such, to gather more accurate information, it is now proposed that a wind monitoring mast, the subject of this report, is installed in the locality as part of the project feasibility to consider constructing a windfarm at this location.

DEVELOPMENT DETAIL
The wind monitoring mast is proposed to be installed for a temporary period of 36 months;
The tower comes equipped with its own solar battery system and transfers the information it collects via Telstra mobile network; and
The tower of the mast is a guyed lattice structure 90m high with a 550mm face width, with several instrument booms to measure the wind speed and direction including the following specifications:
- The leg diameter is: 24mm solid
- The lattice diameter is: 12mm solid
- Step spacing is: 360mm
- Section length is: 3.63m
- Section weight is: 78kgs
- Surface Finish is: hot dip galvanizing or 316 stainless steel
- Finished mast height is: up to 110m
- Anchor configuration: 6 anchor points, 2 in each 120 degree direction

The installation of the tower does not require the clearing of any land and once the mast is taken down it can again be used for cropping.
The mast is proposed to be located on the south-western portion of the subject lot currently used for broad acre farming, as shown on the site plan attached to this report. The lots immediately adjacent to the subject lot are also used for broad acre farming, with the exception of Lot 23420 which is a homestead lot comprising a dwelling, sheds and associated infrastructure which are approximately 1 kilometre from the position of the proposed mast.

ASSESSMENT
- Zoning and Land Use Permissibility
No. 849 (Lot 23430) Notting-Karlgarin Road is zoned ‘Rural’ under the Shire’s Town Planning Scheme No.1. The key objective of the land’s current ‘Rural’ zoning is to ensure the continuation of broad acre farming as the principle land use and to consider non-rural uses where they can be shown to be of benefit to the district and allow for facilities for tourist and travelers.
A wind monitoring mast is not expressly listed in Table 1 – Zoning Table of the Shire’s Town Planning Scheme No.1 and therefore the application is required to be assessed in accordance with clause 18 (4) of the Shire’s Town Planning Scheme No.1. This clauses states as follows:
“(4) The local government may, in respect of a use that is not specifically referred to in the zoning table and that cannot reasonably be determined as following within a use class referred to in the zoning table –

(a) Determine that the use is consistent with the objectives of a particular zone and therefore is a use that may be permitted in the zone subject to conditions imposed by the local government; or
(b) Determine that the use may be consistent with the objectives of a particular zone and give notice under clause 64 of the deemed provisions before considering an application for development approval for the use of the land; or
(c) Determine that the use is not consistent with the objectives of a particular zone and is therefore not permitted in the zone.

In this particular instance, on examining the details of the proposal it is considered that the proposed wind monitoring mast to be constructed on the subject Lot 23430 is consistent with the objectives and purpose of the land’s current ‘Rural’ zoning as it has the potential to be beneficial to the district by facilitating the future possible development of a sustainable energy source, which will have flow on economic and social benefits to the community.

Clause 31 of the Shire’s Town Planning Scheme No.1 sets out the minimum setback from boundaries for proposed development. Under a rural zone the setbacks are prescribed as 20 metres (front); 15 metres (rear) and 15 metres (rear). The proposed location of the mast complies with these setback requirements.

In light of the above, and the existing land uses surrounding the subject lot, being broad acre farming it is reasonable to conclude that the proposed wind monitoring mast will not cause any detrimental impacts or cause any particular land use conflicts, and there is recommended to be approved by the Council subject to conditions.

- **Western Australian Planning Commission Planning Bulletin No.67 - Guidelines for Wind Farm Development**

  The WAPC’s Planning Bulletin No.67 published in May 2004 entitled *Guidelines for Wind Farm Development* provide local government with a guide to the matters required to be considered when assessing land-based wind farm developments throughout Western Australia.

  As the proposal being considered by Council is for a wind monitoring mast only, not all of the matters contained in the guidelines are relevant to the planning application for Lot 23430. The following provisions are however considered relevant and should be considered by Council in determining the application:

  - **Aircraft Safety & Public Health**

    The guidelines recommend that the wind monitoring mast be highlighted in all navigational maps and be equipped with tower safety lighting or marking/s to minimise any potential impact on aircraft safety and the operation of any surrounding airfields. The guidelines also recommend that the Civil Aviation Safety Authority and Air Services Australia be consulted.

    In terms of general public health and safety the guidelines recommend that public access to the site during construction should be prohibited and that perimeter visitor traffic be carefully managed. The installation of fencing around the wind monitoring mast and associated guy wires to prevent public access following completion of construction may also be appropriate.

  - **Design & Construction & Decommissioning**

    The guidelines make the following recommendations regarding the design, construction and decommissioning of wind farms and associated infrastructure:

    - The siting and design of wind farms and associated infrastructure should be undertaken with great care and with due regard to any environmental and landscape impacts;
    - The transport of equipment and freight to the site should be carefully managed and may need to be coordinated with adjacent local governments and the WA Police Department;
    - Towers and foundations should be designed and constructed in accordance with the manufacturer’s specifications;
    - Site clearance works, earth moving, cutting, filling and stockpiling of top soil should be kept to a minimum wherever possible; and
    - When a site is decommissioned the demolition work will need to be appropriately managed and the site reinstated to its original use and condition, or other agreed use.

  - **Landscape & Visual Impact**

    The guidelines make the following recommendations to help minimise the potential negative visual impacts that a wind farm development may have on the local landscape:

    - The siting of wind farms, ancillary buildings, access roads and other associated infrastructure should be located with due regard for the natural landscape and topographical features. They should
complement the natural landform contours and landform backdrop, including ridgelines and not give rise to any visual clutter;
- The choice of materials and colours should complement the skyline and backdrop of the view sheds and dwelling;
- The removal of native vegetation should be minimised and the planting of vegetation screens as visual buffers should be considered where appropriate; and
- Good quality vegetation should be protected and landform rehabilitation undertaken both on and off-site where appropriate.

As the proposed wind monitoring mast is proposed to be a temporary structure, the potential impacts on the visual landscape are unlikely to be permanent. Notwithstanding this conclusion, it should be noted that in the event Lacour’s wind monitoring feasibility study confirms the potential for the development of a medium sized wind farm in the locality, it will be required to undertake a detailed landscape and visual impact assessment to address the wind farm’s potential impact on the landscape prior to the issuance of planning approval. This investigation will be in addition to a range of other environmental impact assessments recommended by the guidelines and required under other relevant legislation, regulations and policies.

**State Planning Policy No.4.1 – State Industrial Buffer Policy**

State Planning Policy No.4.1 entitled *State Industrial Buffer Policy* aims to provide a consistent, statewide approach for the protection and long-term security of industrial zones, transport terminals (including ports) other utilities and special uses. It also provides for the safety and amenity of surrounding land uses.

The key policy objectives are summarised as follows:
- To avoid conflict between industry and essential infrastructure and sensitive land uses.
- To protect industry and essential infrastructure from encroachment by incompatible land uses that would adversely affect their efficient operation.
- To provide for the development of industry and the provision of essential infrastructure in a way that minimises amenity and health impacts on, and takes account of risk to, nearby sensitive land uses.
- To promote compatible uses within areas affected by off-site impacts of industry and infrastructure.

The development of a proposed new wind monitoring mast on Lot 23430 is considered to be generally consistent with the objectives of SPP No.4.1 as it is small in scale, will be located in an isolated part of the Shire dominated by broad acre agricultural uses and is well removed from all existing and proposed sensitive land uses. As such it is unlikely to give rise to any serious land use conflicts in the short term future.

If and when the Shire receives a planning application for the development of a medium sized wind farm in the locality that may have potential to have a negative impact upon the amenity of any existing or future proposed sensitive land uses in the immediate locality, the determining body, which will be the Development Assessment Panel, will be required to have due regard for the provisions contained in SPP No.4.1 and may resolve to refuse any such application if the external impacts associated with the proposed development are considered unacceptable.

**Conclusion**

It is concluded from a detailed assessment of the application in the context of the Shire’s current Town Planning Scheme No.1 and the relevant WAPC guidelines and policy that the proposal to develop a wind monitoring mast on Lot 23430 (No. 849) Notting-Kargarin Road, Kondinin is capable of being approved and implemented in a proper and orderly manner subject to compliance with a number of conditions to ensure that it proceeds in accordance with the details of the plans submitted in support of the application and does not have a negative impact upon the general amenity, functionality and safety of the immediate locality.

In making a final determination on the application it is recommended that Council consider imposing a number of conditions on any approval issued to address the following matters:
- The need to ensure that a building permit approval is obtained from the Shire prior to installation of the new wind monitoring mast;
- The need to ensure that the wind monitoring mast and its foundations are designed and constructed in accordance with the manufacturer’s specifications;
- The need to ensure that the wind monitoring mast complies with the minimum setback requirements for any development on land classified ‘Rural’ zone under TPS No.1;
- The need to ensure that the wind monitoring mast and associated infrastructure is located with due regard for the natural landscape and topographical features;
- The need to ensure that site clearance works, earth moving, cutting, filling and stockpiling of top soil are kept to a minimum wherever possible;
- The need to ensure that public access to the site during and after construction is prohibited;
- The need to ensure that the transport of equipment and freight to the site is carefully managed and coordinated with the Shire of Kondinin, adjacent local governments and the WA Police Department if required;
- The need to ensure that the choice of materials and colours of the wind monitoring mast complement the skyline and backdrop of the view sheds;
- The need to ensure that the removal of native vegetation is minimised and the planting of vegetation screens as visual buffers is undertaken where appropriate;
- The need to ensure that good quality vegetation is protected and landform rehabilitation is undertaken on-site where appropriate;
- The need to ensure that the wind monitoring mast is highlighted in all navigational maps and equipped with tower safety lighting or marking/s to minimise any potential impact on aircraft safety and the operation of any surrounding airfields;
- The need to ensure that the wind monitoring mast and associated infrastructure is regularly maintained in a neat, tidy and safe condition at all times to the specifications and satisfaction of the Shire; and
- The need to ensure that if / when the wind monitoring mast is decommissioned the demolition work is appropriately managed and the site reinstated to its original use and condition, or other agreed use in a timely manner.

STATUTORY ENVIRONMENT

STRATEGIC IMPLICATIONS
Supports the following section of the Shire’s Strategic Community Plan 2016 – 2016
“2.2 Provide sustainable infrastructure and services that support current and future needs of the community
2.2.3 With stakeholders develop and maintain suitable utility services including water, power, sewerage and waste

Action:
- Investigate alternative energy options for the Shire, community and industry e.g. solar, wind, bio-fuel, salt lake power generation.”

VOTING REQUIREMENTS
Simple majority required
RESOLUTION 3084

Moved Cr Growden  Seconded Cr Lynch

That the application for planning approval submitted by the Kondinin Energy Pty Ltd to erect a ninety (90) metre high wind monitoring mast on Lot 23430 (No. 849) Notting-Karlgarin Road, Kondinin be APPROVED in accordance with the details of the plans submitted in support of the application subject to the following conditions:

1. The development is to be completed within a period of two (2) years from the date of this approval. If the development is not completed within this period the approval will lapse and be of no further effect. Where an approval has lapsed, no development shall be carried out without the further approval of the Shire of Kondinin having first been sought and obtained.
2. A completed building permit application with structural certification must be submitted to and approved by the Shire prior to the commencement of any development.
3. The wind monitoring mast and its foundations shall be designed and constructed in accordance with the manufacturer’s specifications.
4. The wind monitoring mast shall be sited in accordance with the details of the plans submitted in support of the application and with due regard for the natural landscape and topographical features.
5. Site clearance works, earth moving, cutting, filling and stockpiling of top soil shall be kept to a minimum.
6. Suitable arrangements being made to ensure that public access to the site during and after construction is prohibited.
7. Suitable arrangements being made to ensure that the transport of all structural materials, equipment and freight to the site is carefully managed and coordinated with the Shire of Kondinin, adjacent local governments and the WA Police Department if required.
8. The materials and colours of the wind monitoring mast shall complement the skyline and backdrop of the view sheds and dwelling.
9. The materials of vegetation shall be kept to a minimum and the planting of vegetation screens as visual buffers shall be undertaken where appropriate.
10. All good quality vegetation shall be protected and landform rehabilitation undertaken on-site where appropriate.
11. Suitable arrangements being made to ensure that the wind monitoring mast is highlighted in all navigational maps and equipped with tower safety lighting or marking/s to the specifications and satisfaction of the Civil Aviation Safety Authority.
12. The wind monitoring mast and associated infrastructure shall be regularly maintained in a neat, tidy and safe condition at all times to the specifications and satisfaction of the Shire and repaired, removed or replaced when considered necessary by the Shire to ensure it does not detract from the visual appearance of the subject land or the immediate locality.
13. In the event that Lacour Energy’s wind monitoring feasibility study confirms that there is no potential for the development of a medium sized wind farm in the locality, this information shall be conveyed to the Shire in writing immediately thereafter and the wind monitoring mast shall be decommissioned and removed from the site within six (6) months of the date of that written notice.
14. If / when the wind monitoring mast is decommissioned the demolition work shall be appropriately managed and the site reinstated to its original use and condition, or other agreed use in a timely manner.

CARRIED 7/0

It was requested that a letter be sent to CASA to determine whether the Telstra Phone Tower located in Kondinin should be on Aviation Navigation Maps.

Tory Young (MPD) left the meeting at 4:46pm and the meeting was adjourned until 5:00pm

9.2.3 – Proposed Scheme Amendment No.8 to Town Planning Scheme No.1 – Outcome of Consultation Period and Final Approval

SUBJECT: Proposed Scheme Amendment No. 8 to Town Planning Scheme No.1,
LOCATION: Lot 330 Clayton Street, Hyden
APPLICANT: Shire of Kondinin
ATTACHMENTS: Attachment #1 – Summary of Submissions  
Attachment # 2 – Scheme Report

DATE OF REPORT: 14th September 2017

AUTHOR: Tory Young, Manager Planning and Development

DISCLOSURE OF INTEREST: Nil

SUMMARY/BACKGROUND
The existing six (6) units at Whispering Gums Retirement Village were constructed in 1998 through a Housing Joint Venture Agreement between the State Housing Commission (Homeswest), the Shire of Kondinin (the Vestee) and the Lions Club of Hyden Inc. (the Organisation). The existing units are located on the southern-most portion of the subject lot 330 which when constructed were on a smaller area of 0.4008 hectares known then as Lot 153 (reserve 41282) Clayton Street, Hyden that was vested in the Shire of Kondinin. The current management of the existing properties is undertaken in accordance with the Housing Joint Venture Agreement and a lease between the Shire of Kondinin (the lessor) and The Lions Club of Hyden Inc. (the Lessee) which expires on 31st December 2019. The lease only applies to the area comprising former Lot 153 covering 0.4008 hectares which is zoned Residential R30 under the Shire’s Town Planning Scheme No.1.

In 2009 after some boundary realignment and tenure transfers between the Shire of Kondinin and the Department of Education, Lot 153 was incorporated into a new larger lot covering 2.316 hectares which became known as the subject Lot 330 and was all transferred to the Shire of Kondinin. Simultaneously another new Lot, (Lot 331) was created covering 2.3852 hectares and vested in the Department of Education and utilised by the Hyden Primary School. The current zoning of the subject Lot 330 still reflects the original land tenure with the majority of the lot currently zoned as a ‘Local Reserve for Public Purpose – Education’ and only the southern-most portion of the lot (the portion originally known as Lot 153) being zoned as Residential R30.

To align with the new land tenure and to enable the expansion of Whispering Gums, it is required that all of Lot 330 is re-zoned to Residential R30 to match this future intended use and development and the current zoning of the former Lot 153. Whilst the funding assumed allocated for two (2) new units from the Royalties for Regions Wheatbelt South Aged Housing Alliance has been discontinued, the Wheatbelt South Aged Housing Alliance is looking for other funding options to fund the development and therefore it is important that the Council continue with this Scheme Amendment to ensure that we are project ready to develop when funds do become available.

Following this matter being considered by Council at its Ordinary Meeting on the 15th March 2017, the proposed Amendment No.8 to the Shire’s Town Planning Scheme No.1 was advertised for a period of 49 days closing on the 21st July 2017, during which time fourteen (14) submissions were received.

The purpose of this report is to consider the submissions received and resolve to progress the Scheme Amendment No.8 to the Shire’s Town Planning Scheme No.1 and recommend final approval to the Western Australian Planning Commission.

- Environmental Protection Act 1996

Policy Implications

Nil

Financial Implications

The advertising and administrative costs associated with this Scheme Amendment are covered within the 2017/2018 budget.

Strategic Implications
The proposal supports the following section of the Shire’s Community Strategic Plan 2016 – 2026

“1.2 A growing, diverse and dynamic community

1.2.1 Facilitate equitable access for residents to services and facilities across the Shire
1.2.3 Increase land supply for residential, commercial and industrial opportunities that can be released quickly to the market
1.2.3 Create aesthetically attractive and vibrant towns within the Shire

- Represent the community’s interests and work with relevant agencies to facilitate affordable, diverse housing and land release strategies.”

Consultation
Following Council’s initiation of the required Amendment No. 8 to Town Planning Scheme No.1 at the Ordinary Meeting on the 15th March 2017, the proposal was referred to the Environmental Protection Authority (EPA) where in a letter dated 8th May 2017, the Shire received environmental clearance. Following the issuance of environmental clearance by the EPA the proposal was advertised by the Shire in accordance with Regulation 47 of the Planning and Development (Local Planning Schemes) Regulations 2015, for a period of 49 days commencing on the 16th May 2017 closing on the 21st July 2017. This process included publication of notices in a local newspaper, information on the Shire’s website and hard copies available at the Shire Offices, and correspondence to adjoining/nearby landowners and all relevant essential public authorities.

A total of fourteen (14) submissions were received with thirteen (13) from essential service authorities and one (1) from an adjacent land owner. Of all the fourteen (14) submissions received none had any objections to the proposal. Details of the outcomes from public advertising are outlined in the Summary of Submissions attached to this Agenda Report.

Voting Requirement
Simple Majority

RESOLUTION 3085
Moved Cr Browning Seconded Cr Butler
THAT Council resolves:
1. ENDORSE the Schedule of Submissions prepared in respect of the submissions received during the public consultation process and the recommendations contained therein as shown in Attachment # 1 to this Agenda Report;
2. Pursuant to Regulation 50 (3) of the Planning and Development Regulations (Local Planning Schemes) Regulations 2015 to SUPPORT without modification the amendment No. 8 to the Shire’s Town Planning Scheme No.1;
3. Pursuant to Regulation 53 of the Planning and Development Regulations (Local Planning Scheme) Regulations 2015 ADVISE the Western Australian Planning Commission of the support of the amendment and provide all the necessary supporting documentation required; and
4. Pursuant to Regulation 35 (2) (a) of the Planning and Development Regulations (Local Planning Schemes) Regulations 2015 that the proposed Scheme Amendment No.8 to the Town Planning Scheme No.1 is a standard amendment for the reasons as follows:
   (a) The amendment will have minimal impact on land in the Scheme Area that is not the subject of the amendment; and
   (b) The amendment does not result in any significant environmental, social, economic or governance impacts on the land in the scheme area.

9.3 CHIEF EXECUTIVE OFFICER’S REPORT

9.3.1 Formal Resignation – Chief Executive Officer
Applicant: Shire of Kondinin
Author: CEO
Date: 8th September, 2017
Disclosure of Interest: Nil
SUMMARY / COMMENT:
I hereby formally resign from my position of Chief Executive Officer of the Shire of Kondinin, effective from Saturday, 28th April, 2018, due to my retirement.
I take this opportunity to thank past and present Councilors and my administration team that I have worked with over that five (5) year period. I would particularly like to sincerely thank Shire President, Allen Smoker, who I have developed strong respect for and who has been such a pleasure to work with and a wise counsel. I will always be grateful for the privilege of developing the professional relationship, as well as friendship, with Allen.
I have thoroughly enjoyed working with the Shire of Kondinin and trust that Councilors and the Shire community acknowledge the positive developments achieved over my time here, for the betterment of the Shire and its communities. I trust also that the standard and professionalism of the Shire’s administration team has been improved through my efforts in the recruitment and promotion of senior personnel and also that the Shire’s finances including reserve funds, etc., have been improved and are in a very healthy and sound state. I sincerely will miss living in the Shire and participating in social events including lawn bowls.
As the Shire of Kondinin moves forward, I trust that it will remain very sustainable, with farming always proving profitable and the Shire’s communities thriving in the wonderful and unique country lifestyle offered in this area that continues to manifest a strong sense of community.

9.3.2 Consultants – CEO Recruitment

Applicant: Shire of Kondinin
Author: CEO
Date: 8th September, 2017
Disclosure of Interest: Nil

SUMMARY / COMMENT:
Quotations received for the recruitment of the CEO position have been obtained as follows:

- WALGA’s recruitment services - $9,250.00 (Ex GST), plus travel, accommodation costs if required.
- (Mike) FitzGerald Strategies - $5,000.00 (Ex GST) includes visit to Kondinin, travel & accommodation costs.
- LoGo Appointments - $7,000.00 (Ex GST) plus travel, accommodation costs.

Advertising costs are met by the Shire, expected to be around $4,000.00.

Mike Fitzgerald’s quote can be considered very reasonable especially considering it includes the comprehensive recruitment process as well as the cost of travel to Kondinin and accommodation, etc. It is noted that he was engaged in the last CEO recruitment.

STATUTORY ENVIRONMENT

Moved Cr Seconded Cr
THAT WALGA Recruitment Services be appointed to recruit the CEO position for the Shire of Kondinin at a cost of $9,250.00 (excluding GST) plus travel, accommodation and advertising costs.

9.3.3 Wheatbelt South Aged Housing Alliance
Applicant: Shire of Kondinin
Author: CEO
Date: 8th September, 2017
Disclosure of Interest: Nil
Attachments: Provisional spreadsheet of funding over 2 years
Agenda of WSAHA meeting of 12th September 2017

SUMMARY/COMMENT
We have now had officially confirmed that Royalties for Regions funding for the Wheatbelt South Aged Housing Alliance Project has not been approved in the recent state budget and that the drafted Financial Assistance Agreement for the project will not be progressed.

Natalie Manton of Wickepin Shire, (lead Shire) has recommended that consideration be given by member Shires of the Wheatbelt South Aged Housing Alliance towards submitting a funding application to Regional Development Australia - Building Better Regions Funding for funding towards building the aged Independent Living Units previously proposed through the Wheatbelt Development Commission, (WDC).

Similar to the WDC funding application, Council’s will still be required to contribute financially towards the development cost, however such funding is not expected to impact the current budget but rather the 2018/19 and 2019/2020 budgets. Under the BBRF guidelines preliminary budgets indicate that the Shire of Kondinin would be required to contribute approximately $260,000.00 towards the cost of the four aged units (two in Kondinin and two in Hyden), spread $130,000 over a two year construction period. This figure includes a contingency cost of $47,500 per year for price escalations. In addition, the Shire would also be required to contribute ‘in kind’ to provision of land $100,000 and project costs of $50,000.

The DCEO attended a meeting in Wickepin with members of the Wheatbelt South Aged Housing Alliance on 12th September to discuss the proposal of seeking further funding. It is to be noted that no actual funding round is open but is expected to be announced before the end of the year. There are extremely strict guidelines to be followed in seeking the funding and the WSAHA needs to be in a position to move quickly on submitting an application for funding. One of the main criteria is the necessity to have a cost/benefit analysis prepared and it was agreed at the meeting that quotes be sought from accredited companies to prepare the analysis. The cost of this analysis will come from the funds already contributed to the WSAHA for the project.

The next meeting of the WSAHA is to be held on 10th October when the quotes and more information should be to hand.

At this stage WSAHA is seeking support from the member Shires in continuing to seek further funding options to provide for the construction independent living units across member Shires.

STATUTORY ENVIRONMENT
Nil

POLICY IMPLICATIONS
Nil

FINANCIAL IMPLICATIONS
Council’s financial contribution towards a successful Building Better Regions Fund application would be required in the 2018/19 and 2019/20 years and would not affect the current budget.

STRATEGIC IMPLICATIONS

1.1 A vibrant and attractive place to live that offers choice and a liveable environment
   1.1.1 Promote the Shire of Kondinin as a great place to live, work, visit and invest
   1.1.2 Encourage greater housing diversity and standards that meets the needs of a broader demographic profile
   1.1.3 Develop infrastructure and support services to create the Shire as an ideal place to retire

Our Actions

- Increase aged care accommodation options within the Shire, including extending Yeerakine Lodge and constructing additional independent living units at West Court Retirement Village (Kondinin) and Whispering Gums (Hyden), coupled with appropriate and complementary health, recreation and community services e.g. Senior Citizens Centre Home And Community Care (HACC), Silver Chain, Men’s Shed
- Work collaboratively and form alliances with local organisations, service providers and neighbouring Shires to improve housing and health services and facilities across the Shire, particular for seniors

VOTING REQUIREMENT

Simple Majority

RESOLUTION 3088

Moved Cr Browning  Seconded Cr James

THAT Council support the Wheatbelt South Aged Housing Alliance investigating grant funding towards the construction of independent living units across member Shires from the Building Better Regions Fund (BBRF).

9.3.4 Container Deposit Scheme

Applicant: Shire of Kondinin
Author: CEO
Date: 8th September, 2017
Disclosure of Interest: Nil

SUMMARY / COMMENT:

WALGA has advised that the state government has released a Discussion Paper on the Western Australian Container Deposit Scheme. The scheme is proposed to be implemented in early 2019. WALGA is seeking Local Government feedback on the Discussion Paper, to inform a sector wide response and an advocacy strategy. WALGA has established a CDS Policy Forum, with representatives from Local Governments across the State. The Policy Forum will inform WALGA’s input into the development and implementation of the Scheme. The state government has also established a Container Deposit Scheme Advisory Group, which includes representatives from the WALGA. WALGA staff will also be attending a number of zone meetings throughout October/November 2017, to gather Local Government feedback on the development and implementation of the Scheme.

The type of containers that are eligible for refund are soft drink cans and bottles, bottled water, flavoured milk drinks, beer and cider cans and bottles, spirit based mixed drinks, sports drinks and any beverage container between 150ml to 3L in size. The types of containers excluded are plain milk containers, flavoured milk containers over 1L, pure fruit or vegetable juice containers over 1L, glass wine and spirit containers, cordials and concentrated fruit and vegetable juices.

The refund amount is to be 10c and eligible containers will be marked accordingly.

CARRIED 7/0

9.3.5 CEO’s General and Project Status Report

1) Staff Matters
We continue to negotiate the EBA and have reached agreement on all matters except the percentage pay increase over the three year EBA term. I have proposed a zero increase in 2017/18, CPI increase for 2018/19 and 2019/20. I expect the matter to be settled within one month.

2) The Humps Standpipe Upgrade (nee King Rocks Dam Upgrade) – Department of Water
June 2017 – The DCEO had a teleconference with the Manager Rural Water Planning from the DoW and Ken Pearce from the Water Corporation on 9th June regarding the Humps dam. Mr Pearce advised that the dam capacity was 40ML not 70ML as previously advised to us by DoW. It was also advised that the Water Corporation will still require the dam for quite a few years to come. They stated however that they would be prepared to provide a license to the Shire for the use of water from the dam and that we would have full use of the water via the current standpipe arrangement. The license will in essence be the same as was recently provided for the use of the Karlgarin town dam. At present the standpipe and tanks are fed direct from the main line to Hyden. At times of water shortages in Hyden access to the tanks is turned off by the Water Corporation. The new proposal would involve the provision of a dedicated line being installed from the dam to the tanks and a separate pump being put in to fill the tanks. It will also be recommended that a larger tank/tanks be installed at the standpipe. This would ensure continuity of supply for farmers etc. Mr Pearce advised that a ballpark cost would be around $50,000 for the required works. When asked by the DCEO who was going to pay for it, it was proffered by the DoW that they would cover the cost once the necessary authorities were worked out. They see this as a far better option than spending in excess of $500,000 on King Rocks dam.

Though the outcome did not provide a solution to the King Rocks dam situation it will provide an assured long term alternative source of water for farmers albeit further to collect than King Rocks should King Rocks dam be compromised in the future. It is apparent that there will be no funding coming forth for the repairs to the King Rocks dam wall given the current state of the economy and the mindset of the current government.

July 2017 – A further teleconference was held on 10th July with the Water Corporation, Dept. of Water And Environmental Regulation (DoWER) to discuss the progress of utilizing the Humps dam and increasing the capacity of the nearby standpipe. The Water Corporation is commencing immediately the preparation of the license to use the water which will take approximately one month. The location of the new pipeline and tanks were discussed and agreed upon with the former to be clarified due to the indigenous heritage value of the area though the pipeline is proposed to be laid down an existing firebreak.

An additional 250,000 litre tank will be installed next to the existing tanks and all 3 will be linked to the new standpipe. Once the license is signed quotes will be sought for the infrastructure. DoWER will be funding all the proposed works.

August 2017 – the process has started with quotes being received for the proposed new tank, standpipe controller, pipeline and pump.

September 2017 – All quotes for work have now been received and are with the Water Corp/DoWER for their consideration and approval.

3) Aged Housing

June, 2017 – There is doubt currently with the change of state government as to whether the Wheatbelt South Aged Accommodation Alliance’s ‘approved’ funding for independent living units will be available.
This puts in doubt the construction of the two units at Hyden (Whispering Gums) and two at Kondinin (Westcourt). In respect of the extension of Yeerakine Lodge, tenders are currently being called and will be reported to Council following the closing and assessment of tenders received.

**July, 2017** – We are still awaiting the decision of the new state government regarding the Wheatbelt South Aged Accommodation Alliance’s ‘approved’ funding for independent living units. Tenders are currently being considered for the construction of Yeerakine Lodge extension.

**August 2017** – The tender for the extension to Yeerakine Lodge was awarded to A Corp Construction Pty Ltd. The sand pad has been constructed and construction is due to commence within the next 2 weeks. We are still awaiting the decision of the new state government regarding the Wheatbelt South Aged Accommodation Alliance’s ‘approved’ funding for independent living units.

**September 2017** – Some delay occurred in constructing/compacting the pad mainly due to rain which has now been remedied. A Corp has engaged KBS to lay the concrete pad and building construction will follow. The concrete pad has been completed and the timber wall frames are currently under construction in Perth. By the time of this meeting erection of the frames should have commenced. Based on the construction schedule construction is approximately 1 week ahead of schedule despite the initial holdups with the pad preparation. Expected project completion is June, 2018.

4) **Staff Housing Construction– Repacholi Parade, Kondinin**

**February, 2017** - The Shire has completed the site sand pad and Kondinin Building Services (KBS) has commenced marking out the lot and security fencing it ready for construction commencement.

**March, 2017** – Progress by KBS over the past month has been very little and slow due to KBS undertaking long overdue work at Kondinin IGA.

**April, 2017** – Kondinin Building Services (KBS) have laid the concrete pad for the residence.

**May, 2017** – KBS have commenced erecting the upright timber frames to the concrete pad.

**June, 2017** – KBS have completed the window and door frames.

**July, 2017** – KBS have completed brickwork. Progress is satisfactory although a late start has caused the whole program to be approximately 8 weeks behind.

**August, 2017** – Good progress is being made by KBS with roof timbers installation almost complete. Doug Davey has advised that as he has accepted a full time MOW’s position with Meekatharra Shire he cannot act as Project Manager for this project. The CEO has been monitoring and project managing this project in Doug’s absence and will continue to do so until project completion.

**September, 2017** – Roof timber construction is now complete and we now await the colour bond roof installation.

5) **Integrated Plans**

**August, 2017** – Administration is currently undertaking a review of our integrated plans to ensure they reflect our anticipated activity over the next five years including our aged accommodation construction program, upgrades to sporting clubs, road construction program, plant replacement program, upgrade of town streets/drainage, Hyden & Karlgarin Centenary town site beautification projects, etc.

**September, 2017** – In progress

6) **Council Elections**

**September, 2017** – As reported in the July, 2017 Council meeting agenda, Local Government elections will be held on Saturday 21 October, 2017. Candidate nominations opened on Thursday 7 September, 2017 closing a week later at 4.00pm Thursday 14 September, 2017. As in previous years Council will be conducting an in-house and in-person election, if required. Necessary arrangements have been made with WALGA regarding bulk advertising of each step involved in the election, which gives cost savings to participating local governments. We have conducted an update of the Shire’s Owners and Occupiers Roll in accordance with the Local Government Act, 1995. This involves checking our Rates Records to ensure that new owners of property are on the Roll, etc.

**RESOLUTION 3090**

Moved Cr Jones
Seconded Cr Lynch

THAT the CEO’s General and Project Status Report be received.

9.3.6 2017 Local Government Election
MINUTES OF THE ORDINARY MEETING HELD ON 20TH SEPTEMBER, 2017

Name of Applicant: Shire of Kondinin
Author: John Read, Chief Executive Officer & Returning Officer
Declaration of Interest: Nil
Date: 18 September, 2017

BACKGROUND / COMMENT:
Seven (7) candidate nominations have been received for the Saturday, 21 October, 2017 Council election to fill the five (5) vacancies. Following a draw, pursuant to Local Government Regulation 30(4) and (5), candidate names appear on the ballot paper as follows:

Steven Jones
Allen Smoker
Susan Meeking
Richard Mouritz
Kyle Gleeson
Gerard Lynch
Paul Green

All necessary advertising has been carried out notifying the public of the election, polling places, etc.

9.4 MANAGER OF WORKS

9.4.1 GENERAL

Construction Crew
We have now completed the Hyden Norseman Road, in which we have achieved approximately 8km of gravel sheeting, we would have achieved a little more however rain and staff issues were a factor. Given this we have now moved to Scrivener Rd and are trying to get through this before we start our RRG works.

I hope to start East Hyden Bin Road on or around the 26th of September which will be full construction and primer seals. From there we will move to Mt Walker Rd to carry out the same type of work as East Hyden Bin Road. This work should take the construction crew through to Xmas.

Kondinin and Hyden Town Sites
We now have a concept design for Kondinin, after meeting again with Dale from Proform there is certainly some challenges that lay ahead of us, especially with the drainage areas being so flat. We expect an actual design in about another 3 weeks, so planning and construction can start.

Plant Repairs
- KN 67 – New cutting edge
- KN 89 - Service
- KN 61 – Service
- KN 59 – Replace heater control (Water Tanker)
- KN 56 – Service
- KN 63 – Service
- KN 69 – Service
- KN 70 - Service

Maintenance Grading
Roads to receive grading are:
- Nambadilling
- Gibson
- Whyte
Some culvert repairs have been undertaken around the shire and also some guide post works.

**Parks and Gardens**

Councillors may have noticed the results of a slashing program around the town in recent weeks. We have hired a mulcher that can mow down grass and small branches. We have hired this machine not only to tidy up prior to the Centenary for the Kondinin School, but also to get the town and surrounding areas looking good for the long term. Once finished in Kondinin we will move over to Hyden and do the same.

The back of the Bowling club is now complete and it is a credit to all involved and I’m sure a precedent has been set for any future works like this within the Shire, especially the recent plans received for Hyden.

**Entry Signs**

As requested at the last meeting please see attached different ideas and cost for the entry statement signs to replace the old pale yellow signs around the shire, especially on the main entry points. I have also given some other examples of other shires for discussion.

**Staff**

Gary Valenta is presently on Workers Comp and there has been no set date on his return. We have employed a casual grader operator (Final Trim) for 2 months stating on the 18th of September. Gary has a Doctors certificate until the 29th of September, and by the general consensus he will not be back at work until at least Mid-October.

9.7 SWIMMING POOL REPORT
Wayne Dicker-Lee returned to work on the 7th August and recommenced his maintenance program for the upcoming season.
There is a considerable number of items that require attention and some that the maintenance department have outstanding. Hopefully they can be finished before the pool opens. The auto dosing unit has been updated and is working well. New signage has been put up to conform to RLSS best practice. The pool facility audit is every 3 years and due in January 2018. When I first took over as manager 8 years ago the pool scored 42%, I am now at 96% and may be able to crack the big one hundred next audit. The Lap Pool was repainted at the end of last season and looks good. I am preparing the baby pool at the moment for its yearly coat of paint. I attended the yearly LIWA conference in Fremantle and this year’s focus was on lifeguard management, there was a keynote speaker from Arizona in the US and could not believe some regional pools including HYDEN have only one person managing the facility. The facilities in the US have a minimum 4 lifeguards on duty at any one time. LIWA and RLSS are looking at changing the ratio from 1 lifeguard per 100 patrons to 1:50. I don’t know how this will work at regional pools? I also completed my lifeguard requalification while in Fremantle.
