Proposed Amendment to Schedule 4 (Clause 1) of the Building Regulations 2012

The Shire of Kondinin is seeking comment to amend Schedule 4 (Clause 1) of the Building Regulations 2012 to include the Shire of Kondinin as being exempt from building permits in certain circumstances.

The amendment proposed is shown in italics in the table below extracted from the Building Regulations 2012.

Schedule 4 — Building work that does not require building permit

[r. 41]

1. Areas where building permit not required for certain work

Column 1 Local government district	Column 2 Area where building permit not required for building work for Class 10 building or incidental structure	Column 3 Area where building permit not required for building work for building other than Class 10 building or incidental structure
<i>Shire of Kondinin</i>	<i>Areas zoned rural by a local planning scheme</i>	<i>Areas zoned rural by a local planning scheme</i>

Schedule 4 (Clause 1) of the Building Regulations 2012 prescribes areas where a building permit is not required for certain work in a local government district. Exemptions apply in local government areas where a building permit is not required for building work for Class 10 building or incidental structure (Column 2) or an area where a building permit is not required for building work for building other than Class 10 building or incidental structure (Column 3). Most exemptions afforded to Local Government Districts apply to Column 2 for class 10 buildings or incidental structures for works across the district other than townsites.

The National Construction Codes classify buildings into classes depending on their use from Class 1 through to Class 10. Class 10 Buildings exempt under Column 2 are defined as follows:

Class 10 buildings are non-habitable buildings or structures. Class 10 includes 3 sub-classifications:

Class 10a buildings are non-habitable buildings including sheds, carports and private garages

Class 10b is a structure being a fence, mast, antenna, retaining wall, swimming pool or the like

Class 10c building is a private bushfire shelter. A private bushfire shelter is a structure associated with but not attached to a Class 1a building.

Column 3 relates to all other building classifications (1 to 9) under the National Construction Codes.

More information on this proposal can be viewed on the Shire website www.kondinin.wa.gov.au or by contacting the Shire 08 9889 1006.

All submissions are to be addressed to the Shire's Chief Executive Officer and submitted via email on mpd@kondinin.wa.gov.au, via post at PO Box 7 Kondinin WA 6367 or hand delivered to the Shire Office in Hyden or Kondinin by 4.00PM Monday 24 August 2026.

Community Updates

Future of the Karlgarin Sports Pavilion

The Shire of Kondinin is planning for the future and is seeking community feedback on the possible removal of the Karlgarin Sports Pavilion.

The building is currently in a state of disrepair, and a recent inspection of the Shire's public buildings identified that significant maintenance works and ongoing cleaning would be required to improve its presentation and functionality moving forward.

Before any decisions are made, the Shire would like to hear from the community.

Please take a few moments to consider the future of the facility and complete the survey via the link below.

Your feedback will help Council understand community priorities and inform future planning for Karlgarin's community facilities.

Please note that no community gym facilities have been approved, funded, or confirmed at this stage. This consultation is being conducted solely to inform future planning and decision-making.

To assist with this process, we would like to hear from residents about the types of gym equipment they would most like to see included should a community gym project proceed in the future.

Please take a few minutes to complete the survey via the link below. Your feedback will help guide future planning and ensure any potential facilities reflect community needs.

Thank you for taking the time to contribute to the future planning of recreation and wellbeing opportunities in our communities.

WARRIOR WELLBEING ARTICLE

Bowel Health – It's Worth Giving a

BY THE REGIONAL MEN'S HEALTH INITIATIVE
August 2026

The bowel is an important part of our digestive system, but what is it, and what should we be aware of when weighing up our overall bowel health?

The bowel is made up of 3 parts:

1. The *small intestine* is around 6 meters in length and

is the narrower (small) section of the bowel.

It absorbs the nutrients in the food we digest.

2. The *colon* and rectum make up the larger intestine, it is much shorter but thicker. Its role is to reabsorb fluid and process the waste material.

3. Finally, the *rectum* is where the waste material is stored until we go and *drop a log* so to speak.

What comes out and the frequency of our bowel movement is something else we should take note of. Our poo or stool should be soft, sausage shaped and should not require too much effort to pass. The frequency can depend on individual habits, changes to our diet, but the main thing to remember here is a sudden change in your poo routine could indicate other issues.

What's *not* normal?

Signs of Blood: Bright or fresh signs of blood on the toilet paper could be the result of haemorrhoids (usually a result of constipation or straining too hard) or wiping too hard and frequently can cause small cuts/tears on the anus. Blood in the poo (especially darker blood) could mean bleeding further up the bowel and should be discussed with a doctor immediately.

Constipation: Dry or hard poo sometimes associated with cramping or bloating in our lower abdomen (something we have all probably experienced) can often be resolved with some lifestyle changes i.e. drinking plenty of water, eating a diet high in soluble fibre (fruit/vegies/oat bran/lentils/beans) and increase in physical activity.

Diarrhoea: We have all probably had a mean curry that has caused us to frequent the loo, but diarrhoea is usually caused by our intestine becoming inflamed and irritated affecting the reabsorption of water from the waste material. This can be caused by numerous factors such as: illness/infection, food poisoning, drinking contaminated water, ulcers, stress and certain food intolerances.

Leakage: Accidental leakage or incontinence can be associated with severe diarrhoea but can also be caused by weakness or damage to the muscles around our bowel and anus. The Continence Foundation of Australia is a great resource to get assistance, advice and support if you are affected by incontinence.

If any of these issues are having an effect for more than 2-3 days, a visit to the doctor is recommended. A prominent cancer is bowel cancer and can remain undetected until well advanced. Participate in the free bowel cancer screening test from the age 45 onwards – it saves lives!

Remember good bowel health and our digestive system is often compared to being just as important as brain function, just at the other end of the body. Remember it is worth giving a shit about!

KING ROCKS WIND FARM

COMMUNITY UPDATE — JULY 2026

WIND FARM CONSTRUCTION PROGRESS

CONSTRUCTION OF THE KING ROCKS WIND FARM CONTINUES TO PROGRESS WITH THE DELIVERIES OF TURBINE COMPONENTS ARRIVING TO SITE.

WE ARE PLEASED TO SHARE THAT ALL 17 TURBINE FOUNDATIONS ARE NOW POURED AND THE CONCRETE BATCHING PLANT HAS BEEN DECOMMISSIONED. AS THE CIVIL WORKS ARE COMING TO AN END, WE WOULD LIKE MOTORISTS TO BE AWARE OF PLANT AND EQUIPMENT VEHICLES DEPARTING.

INSTALLATION OF THE TURBINES HAS COMMENCED. EACH TURBINE CONSISTS OF 11 SEPARATE SECTIONS: FIVE TOWER SECTIONS, A NACELLE, A GENERATOR, A HUB AND THREE BLADES. WE HAVE SIX TURBINES WITH THE FIRST TWO SECTIONS OF THE TOWERS ALREADY LIFTED INTO PLACE.

DID YOU KNOW: WIND TURBINES DON'T JUST SPIN, THEY HAVE THREE SEPARATE WAYS TO MOVE TO CAPTURE THE WIND. THE BLADES ROTATE TO GENERATE ELECTRICITY AND CAN TILT INDEPENDENTLY TO CONTROL HOW MUCH WIND THEY CATCH, AND THE TURBINE HEAD TURNS TO STAY ALIGNED WITH THE WIND AS IT SHIFTS.

UPCOMING OVER-SIZED DELIVERIES

IN THE COMING WEEKS, COMMUNITY MEMBERS CAN EXPECT TO SEE TURBINE BLADES ON THEIR WAY TO SITE. THE BLADES, WHICH MEASURE 80M IN LENGTH, ARE SCHEDULED TO PASS THROUGH THE SHIRE OF KONDININ IN THE EARLY AFTERNOON BEFORE TRAVELLING TO THE WIND FARM.

TURBINE TOWER SECTION BEING LIFTED INTO PLACE.

BLADES AND OTHER TURBINE COMPONENTS WILL BE ESCORTED BY TRAFFIC PILOTS. IF YOU FIND YOURSELF BEHIND AN OVERSIZED LOAD, PLEASE DO NOT PASS UNTIL THE PILOT HAS GIVEN YOU AN INSTRUCTION TO DO SO. THE BLADE TRANSPORT DELIVERY SIZES WILL BE UP TO 94 METRES IN LENGTH, 4.4 METRES IN WIDTH, AND 27 TONNES EACH LOAD. THE OVERSIZED LOADS WILL BE STOPPING EVERY 20-25 KM ALONG THE ROUTE TO RELIEVE ANY TRAFFIC BEHIND THEM.

IF SLOWED BEHIND AN OVERSIZED LOAD, SCHOOL BUS OPERATORS ARE ASKED TO CONTACT THE PILOT USING UHF CHANNEL 40 TO NOTIFY THEM OF THEIR POSITION BEHIND THE LOAD. THE LOAD WILL THEN PULL OVER WHEN SAFE TO DO SO AND THE PILOT WILL SIGNAL FOR THE SCHOOL BUS TO PASS.
